Interac e-Transfers are a fast and convenient way to send money to anyone from within the security of your online or mobile banking service. It's a great alternative to cheques and cash. To send an Interac e-Transfer sign in to online or mobile banking at a participating financial institution, and look for the option to send an Interac e-Transfer (or Interac Email Money Transfer). All you need is an email address and the email address and/or mobile telephone number of the person you are sending money to. Email and/or text messages carry the notification while the financial institutions use existing payment networks to transfer the money to any financial institution in Canada.

Contact your financial institution or visit their online banking website to sign up.

Step 1 Login to your financial institution's mobile /online banking portal.

Step 2 Exact instructions will vary by participating financial institutions.

Once you are logged in to your online bank account, navigate to the section for Interac e-Transfer and simply follow their instructions to add a recipient and start sending money.

Step 3 Type in my email address; rcemegolftournament@gmail.com
